The content was incredibly engaging and empowering, providing both knowledge and practical exercises that made the learning experience immersive. The group activities were particularly effective in helping us apply the concepts in a collaborative and hands-on way. The trainers did an excellent job, clear, approachable, and fun, keeping the session lively and easy to follow despite the late hour. This is a must-attend workshop for anyone looking to build confidence in intervening as a bystander effectively and safely. I left with actionable skills that I feel I can use in real-world situations. Highly recommended!

 Participant from the February 2025 Bystander Intervention Training

“ The workshop was really great! Getting the tools to practice the interventions and having the time to practice them in the workshop are both extremely helpful. All the members of the Meta Peace Team were engaging and provided great information with humor and compassion. Great job all! ”
